

Sushi Conveyor Example Right Angle 'L' Type SC85-003a

Single lane corner

Wasabi in the Millennium Dome

- A right angle 'L' twin lane conveyor layout can be very efficient in certain restaurants.
- It can be easily be positioned to maximise the seating arrangements.
- Shown here with a customer counter.
- Footrests can be added as part of the construction.
- It can easily be extended in the future with the addition of our standard modular sections.
- Commonly used modules are straight sections, corners and tees.
- Standard lengths for each side are from 1.7m to 25.1m in 0.6m increments, over outside of conveyor.
- Drive and idler ends are 0.55m long and straight sections are 2.4m, 1.2m and 0.6m long.
- Support frame, footrest, cladding are optional.
- Customer counters are supplied in Corian, wood, glass, plastic laminate etc.
